| <b>Ergonomy</b>                      | The 33 mm diameter enables the rail to be held comfortably and firmly. The projection of 50 mm from the wall makes it easy to take hold of the rail.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

# PRESSALIT®

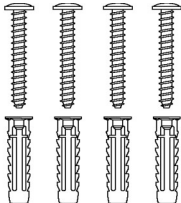

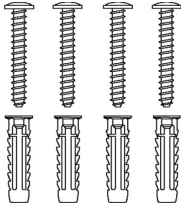

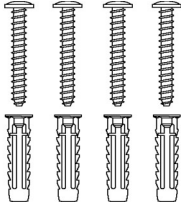

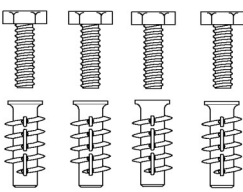

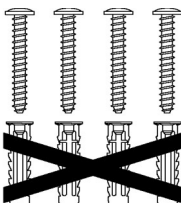

|                    |                                                                                                                                                                            |
