| <b>Cleaning</b>    | <p>This product should be cleaned with hot water or a mild cleaning solution. Do not use chlorine based, corrosive or abrasive cleaners as it may result in the surface being damaged.</p> <p>The following cleaning agents have been tested by Pressalit and may be used, as long as they are diluted according to the instructions on the container.</p> <p><b>DISINFECTANTS:</b><br/>Erisan OXY+<br/>Tvättsprit 70%<br/>CaviCide surface disinfectant decontaminant cleaner<br/>Rodalon Desinfektionsspray<br/>Terralin protect (SCHÜLKE+)<br/>Dismonzon Plus (BODE Chemie GmbH)</p> <p><b>NON-DISINFECTANTS:</b><br/>Wetrok Caledor (Wetrok)<br/>Petrosol Citro (Büfa)</p> <p>Important: Polyurethane surfaces of PLUS shower seats and PLUS backrests contains an antibacterial surface, which will be compromised if cleaned with anything other than soap and water.</p> <p>The product must be wiped down with a soft rag wrung out in clear water immediately after cleaning, as some materials may otherwise be discolored and stained, and the surface coating may deteriorate.</p> <p><b>DECALCIFICATION OF ALUMINUM PARTS:</b><br/>Pressalit recommends that water deposits (Calcium, lime etc.) be removed from wall tracks and other aluminum parts using a solution of three parts of 30% acetic acid to seven parts tap water. When the aluminum parts have been washed down with this solution, the parts should be wiped over with a damp cloth wrung out in plain water.</p> |
