|                                      |                                                                                                                                                                                                                                                             |
|--------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product</b><br><b>Item number</b> | Shower head with normal jet<br>RT612                                                                                                                                                                                                                        |
| <b>Product description</b>           | <p>EAN: 5708590346823<br/>HMI: 42225</p>  <p>Shower head with normal jet, with 2000 mm hose<br/>Shower head with normal jet, with 2000 mm hose, chrome-look plastics</p> |
| <b>Materials</b>                     | Plastic                                                                                                                                                                                                                                                     |
| <b>Ergonomy</b>                      | The curved shape of the handle and the weight balance between head and handle makes the shower head suitable for hands with little strength.                                                                                                                |
| <b>Warranty</b>                      | Pressalit makes a commitment to remedy material and manufacturing defects for a period of five years from the invoicing date.                                                                                                                               |
| <b>Cleaning</b>                      | The product is to be cleaned with hot water or a mild soapy cleaning agent. Do not use chlorine based or corrosive cleaners as it may result in the surface being damaged.                                                                                  |
