| <b>Features</b>    | <p>Manual lifts are adjusted in height using a crank handle.<br/>They can be used with countertops, with or without an edge.<br/>The crank handle socket can be positioned anywhere along the front edge, except under a sink or hob.<br/>Lifts can be adapted to most standard kitchen components.<br/>Lifts are available for countertops of any length between 23.6" and 118.1".<br/>Height adjustable 11.8".</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>Warranty</b>    | <p>Pressalit makes a commitment to remedy material and manufacturing defects for a period of three years from the invoicing date.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>Cleaning</b>    | <p>This product should be cleaned with hot water or a mild cleaning solution.<br/>Do not use chlorine based, corrosive or abrasive cleaners as it may result in the surface being damaged.</p> <p>The following cleaning agents have been tested by Pressalit and may be used, as long as they are diluted according to the instructions on the container.</p> <p><b>DISINFECTANTS:</b><br/>Clinimax Difficil-S<br/>Erisan OXY+<br/>Sprit (husholdningsprit)<br/>Suma Bac D10<br/>Virkon<br/>Rodalon Desinfektionsspray<br/>Lysoformin Spezial<br/>CaviCide<br/>Sufanios Premium<br/>Tvättsprit 70%</p> <p><b>NON-DISINFECTANTS:</b><br/>Suma Star free D1<br/>Taski 100<br/>Taski 200<br/>Milizid Citro</p> <p>The product must be wiped down with a soft rag wrung out in clear water immediately after cleaning, as some materials may otherwise be discolored and stained, and the surface coating may deteriorate.</p> <p><b>DECALCIFICATION OF ALUMINUM PARTS:</b><br/>Pressalit recommends that water deposits (Calcium, lime etc.) be removed from wall tracks and other aluminum parts using a solution of three parts of 30% acetic acid to seven parts tap water. When the aluminum parts have been washed down with this solution, the parts should be wiped over with a damp cloth wrung out in plain water.</p> |
