| <b>Product description</b>                                                  |  <p>All PLUS support arms come with an integrated counter-balance, which ensures a controlled movement between horizontal and vertical positions.</p> <p>PLUS support arm with operating panel, counter-balanced, 700 mm. Height adjustable 150 mm. Foldable. Left handed. Only for use with TL3/TL4 toilet lifter. Ergonomically shaped to provide a clear sense of where the support arm ends. Materials: The arms are constructed of 10-micrometre anodized aluminium, with a non-slip gripping surface made of soft SEBS incorporating a glass-reinforced nylon core. Excl. mounting kit.</p>       |
| <b>Adjustability</b><br><b>Adjustment height</b><br><b>Product capacity</b> | Height adjustable<br>150 mm<br>Maximum load: 150 kg                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Materials</b><br><b>Ergonomy</b>                                         | <p>The arms are primarily constructed in 10-micrometre anodized aluminium, with a non-slip gripping surface at the end made of soft SEBS and incorporating a glass-reinforced nylon core. The hinge arm is also made of soft SEBS. Internal components and fasteners are primarily made of stainless steel. The hinge barrel is capped with ABS polymer.</p> <p>The oval shape gives an easy and comfortable surface to lean and push against.</p> <p>The end of the support arm is enlarged so that it is easier to pull forward from a sitting position and also provides a clear sense of where the support arm ends.</p> <p>Soft and slip-resistant material that has a warm feel.</p> |

| <b>Features</b>    | The underside is shaped for the mounting of various accessories.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Warranty</b>    | Pressalit makes a commitment to remedy material and manufacturing defects for a period of five years from the invoicing date.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>Cleaning</b>    | <p>PLUS support arms</p> <p>The product is to be cleaned with hot water or a mild soapy cleaning agent. Do not use chlorine based, corrosive or abrasive cleaners as it may result in the surface being damaged.</p> <p>The following cleaning agents have been tested by Pressalit and may be used, as long as they are diluted according to the instructions on the container.</p> <p><b>DISINFECTANTS:</b></p> <p>Clinimax Difficil-S<br/>Erisan OXY+<br/>Sprit (husholdningssprit)<br/>Suma Bac D10<br/>Virkon<br/>Rodalon Desinfektionsspray<br/>Lysoformin Spezial<br/>CaviCide<br/>Sufanios Premium<br/>Tvättsprit 70%<br/>Oxyplus-acid 2% (Diversey)<br/>WipeClean UniversalCleaning<br/>Chlorine Disinfection Wipes</p> <p><b>NON-DISINFECTANTS:</b></p> <p>Suma Star free D1<br/>Taski 100<br/>Taski 200<br/>Milizid Citro</p> <p>The product must be wiped down with a soft rag wrung out in clear water immediately after cleaning, as some materials may otherwise be discolored and stained, and the surface coating may deteriorate.</p> <p><b>DECALCIFICATION OF ALUMINUM PARTS:</b></p> <p>Pressalit recommends that chalky deposits be removed from wall tracks and other aluminum parts using a solution of three parts 30% acetic acid to seven parts tap water. When the aluminum parts have been washed down with this solution, the parts must be wiped over with a damp cloth wrung out in clear water.</p> |
