| <b>Adjustability</b><br><b>Product capacity</b>        | <p>Fixed mounting</p> <p>Maximum load: Up to 2200 lbs. depending on the wall type.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Materials</b><br><b>Ergonomy</b><br><b>Features</b> | <p>The wall track is primarily made of 10-micrometer anodized aluminium. The cover plate is made of polystyrene and the ends of the track are capped with ABS polymer.</p> <p>The track distributes the weight of the individual bathroom product, for example a sink bracket, along its entire length. The products can be adjusted and locked on to the track with intuitive locking functions.</p> <p>The horizontal track makes it possible to shift the product along the wall to generate extra space as needed. The front cover plate conceals mounting bolts and any cables.</p>                    |
| <b>Warranty</b>                                        | <p>Pressalit makes a commitment to remedy material and manufacturing defects for a period of five years from the invoicing date.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| <b>Cleaning</b>    | <p>This product should be cleaned with hot water or a mild cleaning solution. Do not use chlorine based, corrosive or abrasive cleaners as it may result in the surface being damaged.</p> <p>The following cleaning agents have been tested by Pressalit and may be used, as long as they are diluted according to the instructions on the container.</p> <p><b>DISINFECTANTS:</b><br/>Clinimax Difficil-S<br/>Erisan OXY+<br/>Sprit (husholdningssprit)<br/>Suma Bac D10<br/>Virkon<br/>Rodalon Desinfektionsspray<br/>Lysoformin Spezial<br/>CaviCide<br/>Sufanios Premium<br/>Tvättsprit 70%</p> <p><b>NON-DISINFECTANTS:</b><br/>Suma Star free D1<br/>Taski 100<br/>Taski 200<br/>Milizid Citro</p> <p>The product must be wiped down with a soft rag wrung out in clear water immediately after cleaning, as some materials may otherwise be discolored and stained, and the surface coating may deteriorate.</p> <p><b>DECALCIFICATION OF ALUMINUM PARTS:</b><br/>Pressalit recommends that water deposits (Calcium, lime etc.) be removed from wall tracks and other aluminum parts using a solution of three parts of 30% acetic acid to seven parts tap water. When the aluminum parts have been washed down with this solution, the parts should be wiped over with a damp cloth wrung out in plain water.</p> |
